Project Name	Metro Ticket Generating System in ServiceNow
Maximum Marks	2 Marks

Customer Problem Statement:

Metro transportation systems often face challenges in managing ticket bookings efficiently, especially during peak travel hours. Passengers are required to wait in long queues at ticket counters, leading to delays, inconvenience, and reduced customer satisfaction. Traditional ticketing methods involve manual fare calculation, physical ticket issuance, and increased operational effort.

In addition, the absence of a centralized digital ticketing platform makes it difficult to provide a seamless booking experience, track ticket usage, and analyze travel patterns. These limitations highlight the need for an automated, user-friendly, and scalable solution that can simplify the ticket booking process while improving operational efficiency.

The proposed Metro Ticket Booking System leverages ServiceNow to digitize the entire ticketing workflow. The system enables users to book tickets online, automatically calculates fares based on selected stations, generates digital tickets with QR codes, and provides instant notifications. This helps reduce manual intervention, minimize waiting time, and enhance the overall commuter experience.

The screenshot displays the 'Book A Metro Ticket' form within the ServiceNow interface. The form is titled 'Book A Metro Ticket' and features the Metro Rail logo. It includes a 'Quantity' dropdown set to '1' and a 'Delivery Time' dropdown set to '2 Days'. Below these, there are buttons for 'Add to Cart', 'Save as Draft', and 'Book Now'. The form also contains a 'Required Information' section with a 'Book Now' button. The main form area includes fields for 'Passenger Name', 'Email Address', 'Travel Date', 'Booking From', 'Booking To', and 'Journey Type'. A note indicates that 'Passenger Name' is required and provides a link to 'View Details'. The form is part of a larger system, as evidenced by the 'ServiceNow' logo in the top left corner and the 'Book A Metro Ticket' breadcrumb in the top right corner.
