Proposed Solution Template**

Date	25-06-2026
Team ID	23A51A4250
Project Name	Metro Ticket Generating System in ServiceNow
Maximum Marks	2 Marks

Proposed Solution :

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Traditional metro ticket booking involves long queues, manual fare calculation, and physical ticket issuance, resulting in delays, inconvenience, and reduced passenger satisfaction. The project aims to digitize and automate the metro ticket booking process.
2.	Idea / Solution description	Develop a Metro Ticket Booking System using ServiceNow that enables users to select stations, enter journey details, automatically calculate fares, generate digital tickets, receive booking confirmations, and access QR-codebased tickets through a self-service portal.
3.	Novelty / Uniqueness	The solution combines Service Catalog, automated fare calculation, digital ticket generation, QR-code-based ticketing, notifications, and reporting within a single ServiceNow platform, providing an end-to-end metro ticketing solution.
4.	Social Impact / Customer Satisfaction	Reduces waiting time at ticket counters, promotes digital and contactless ticketing, improves commuter convenience, enhances travel experience, and increases overall customer satisfaction through faster and more efficient ticket booking.
5.	Business Model (Revenue Model)	Revenue is generated through metro ticket sales. The platform can also support additional revenue streams such as premium passes, subscription-based travel plans, advertisements, and integration with digital payment services.
6.	Scalability of the Solution	The solution is built on the ServiceNow cloud platform and can easily scale to support

		additional metro stations, routes, users, ticket volumes, and future enhancements such as mobile applications, payment gateways, and smart transit integrations.

The screenshot displays the 'Book A Metro Ticket' page in the servicenow system. The breadcrumb trail is 'Home > All Catalogs > Service Catalog > Office > Services > Book A Metro Ticket'. The main form includes the Hyderabad Metro Rail logo and a section titled 'Indicates required' with the question 'What do you want to do Today?'. Three radio buttons are present: 'Recharge Metro Card', 'Book Q/R Ticket' (which is selected), and 'none'. Below this, there are input fields for 'Passenger Name', 'Email Address', 'Travel Date', 'Starting Point', and 'Ending Point'. Further down, there are fields for 'Journey Type' (with 'Single' selected), 'No. Of Passengers', 'Amount Per Single Journey', and 'Amount including Return'. An 'Add attachments' section is at the bottom. On the right, a sidebar shows 'Quantity: 1' and 'Delivery Time: 0 Days' with buttons for 'Add to Cart', 'Save as Draft', and 'Order Now'. A 'Required information' section lists 'Smart Card Holder Name', 'Smart Card Number', 'Recharge Amount', and 'Email Address'.

This screenshot shows the 'Recharge Metro Card' option within the same servicenow portal. The breadcrumb trail remains 'Home > All Catalogs > Service Catalog > Office > Services > Book A Metro Ticket'. In the 'What do you want to do Today?' section, the 'Recharge Metro Card' radio button is now selected. The form fields are updated to include 'Smart Card Holder Name', 'Smart Card Number', 'Recharge Amount', and 'Mode Of Payment' (with 'UPI' selected). The 'Email Address' field is also present. The right sidebar continues to show 'Quantity: 1' and 'Delivery Time: 0 Days' with the same 'Add to Cart', 'Save as Draft', and 'Order Now' buttons. The 'Required information' section lists 'Smart Card Holder Name', 'Smart Card Number', 'Recharge Amount', and 'Email Address'.
